

FORMULATIONS GUIDE

FORMULATION CHARTS

FORMULATION CHARTS

Building Crop Defense Formulas that Work

As the agricultural industry grows to meet increasing demands, growing crops safely, efficiently and economically becomes a greater priority. Losses to insects, weeds and disease are simply unacceptable.

You can help crop growers minimize those losses – and still meet strict environmental regulations – with crop defense formulations that incorporate products from The Dow Chemical Company (Dow). With a comprehensive range of formulation components, Dow is positioned to help you arrive at a customized solution engineered to meet exacting specifications.

Dow offers a single source for everything from surfactant adjuvants for in-can and tank mixes to propylene glycol, amines and chelants. Each product is backed by the Company's exceptional technical expertise, providing the guidance and support needed to create an optimized solution.

Many Dow materials also feature low toxicity, helping formulators deliver crop defense products with minimal environmental impact. Through ongoing research and innovation, along with its extensive global supply network, Dow is consistently improving agrochemical performance and helping the agricultural industry grow.

The following pages provide an overview of Dow's diverse portfolio of materials for crop defense formulations, including:

- Wetting agents
- Dispersants
- Foam control agents
- Adjuvants
- Emulsifiers
- Neutralizers
- Solvents
- Chelating agents
- Amines

Contact your local Dow Crop Defense technical representative or nearest Dow location for more information, including sampling and regional availability.

Stand Out in the Field with Dow

Meet the challenges of today's agricultural crop defense formulation requirements with:

- In-depth product performance expertise
- A diverse portfolio of formulation components
- Customized solutions
- Global supply capabilities

Nonionic Surfactants

Family	Product	Molecule	CAS Number	HLB ⁽¹⁾	Surface Tension ⁽²⁾	Cloud Point ⁽³⁾	Potential Formulations ⁽⁴⁾

⁽¹⁾Hydrophilic-lipophilic balance (HLB) range: <10 water-in-oil emulsifier, >10 oil-in-water emulsifier, 10-15 good wetting, 12-15 detergents
⁽²⁾Surface tension: dynes/cm at 1% actives, 25°C ⁽³⁾Cloud point (°C, 1% aqueous solution)

⁽⁴⁾EC = emulsifiable concentrate; SL = soluble concentrate; SC = suspension concentrate; EW = emulsion: oil in water;
 OD = oil dispersion; SE = suspo-emulsion; ME = micro-emulsion

Nonionic Surfactants – continued

Product	Recommended Applications
ECOSURF™ EH-3	Excellent emulsifier, soluble in oil, low foam formation, low odor, easy to handle, very low aquatic toxicological profile. Good emulsifier for OD formulations.
ECOSURF™ EH-6	Exceptional humectancy, low foam formation, for SC and SL formulations. Low odor, excellent handling and formulation properties, very low aquatic toxicological profile.
ECOSURF™ EH-9	Exceptional humectancy, low foam formation, for SC and SL formulations. Low odor, excellent handling and formulation properties, very low aquatic toxicological profile. Excellent water solubility, no gel formation.
ECOSURF™ EH-14 (90%)	High HLB, low odor and good humectant profile.
ECOSURF™ SA-4	Seed oil-based surfactant, low odor, avoids gel formation. Oil soluble emulsifier with excellent humectant profile, especially for OD formulations.
ECOSURF™ SA-7	Seed oil-based surfactant, provides better emulsifier properties for EC formulations. Low odor, avoids gel formation, is quick to dissolve. Excellent humectant.
ECOSURF™ SA-9	Seed oil-based surfactant, provides better emulsifier properties for EC formulations. Low odor, avoids gel formation, is quick to dissolve. Excellent humectant.
ECOSURF™ SA-15	Seed oil-based surfactant, low odor, avoids gel formation, is quick to dissolve. Excellent humectant and stabilizer for SC formulations.
ECOSURF™ LF-20	Antifoam alternative for non-polar formulations (oil based).
ECOSURF™ LF-30	Antifoam alternative for water based formulations.
ECOSURF™ LF-45	Very low foam humectant.
TERGITOL™ 15-S-3	Excellent compatibility with hydrocarbons. Good humectant and emulsifier for OD formulations.
TERGITOL™ 15-S-5	Excellent compatibility with hydrocarbons. Good humectant and emulsifier for OD formulations.
TERGITOL™ 15-S-7	High humectant and emulsifier capacity. Excellent formulation and handling properties.
TERGITOL™ 15-S-9	High humectant and emulsifier capacity. Excellent formulation and handling properties.
TERGITOL™ 15-S-12	High humectant properties, provides better stability for SC formulations.
TERGITOL™ 15-S-15	High humectant properties, provides better stability for SC formulations.
TERGITOL™ 15-S-20	Excellent emulsion stabilizer, brings stability to temperature cycles and has good handling properties.
TERGITOL™ 15-S-30	Excellent emulsion stabilizer, brings stability to temperature cycles and has good handling properties.
TERGITOL™ 15-S-40 (70%)	Excellent emulsion stabilizer, brings stability to temperature cycles and has good handling properties.
TERGITOL™ NP-4	Excellent oil soluble surfactant, emulsifier with low HLB.
TERGITOL™ NP-6	Excellent emulsifier, humectant and stabilizer.
TERGITOL™ NP-7	Excellent emulsifier, humectant and stabilizer.
TERGITOL™ NP-8	Excellent emulsifier, humectant and stabilizer.
TERGITOL™ NP-9	Excellent humectant and emulsifier, compatible with a large variety of active ingredients (Als).
TERGITOL™ NP-9.5	Excellent humectant and emulsifier, compatible with a large variety of Als.
TERGITOL™ NP-10	Excellent humectant and emulsifier, compatible with a large variety of Als.
TERGITOL™ NP-11	Excellent humectant and emulsifier, compatible with a large variety of Als.
TERGITOL™ NP-12	Excellent humectant and emulsifier, compatible with a large variety of Als.
TERGITOL™ NP-13	Excellent humectant and emulsifier, compatible with a large variety of Als.
TERGITOL™ NP-15	Gives better stability for formulations, even in processes and applications with high temperatures.
TERGITOL™ NP-30	Emulsifier and stabilizer that is highly soluble in water, with high efficacy at high temperatures.
TERGITOL™ NP-30 (70%)	Emulsifier and stabilizer that is highly soluble in water, with high efficacy at high temperatures.
TERGITOL™ NP-40	Efficient in high temperatures, emulsifier and stabilizer, highly soluble in water, with humectant properties.
TERGITOL™ NP-40 (70%)	Efficient in high temperatures, emulsifier and stabilizer, highly soluble in water, with humectant properties.
TERGITOL™ NP-50 (70%)	Efficient in high temperatures, emulsifier and stabilizer, highly soluble in water, with humectant properties.
TERGITOL™ NP-70 (70%)	Efficient in high temperatures, emulsifier and stabilizer, highly soluble in water, with humectant properties.
TERGITOL™ TMN-3	Excellent for oil formulations (i.e., OD) and for waxes, paraffins and silicones.
TERGITOL™ TMN-6 (90%)	Agent with excellent humectant and penetrant properties (excellent surface tension reduction), especially for adjuvants and fungicide formulations. Excellent emulsifier for waxes, paraffins, and silicones.
TERGITOL™ TMN-10 (90%)	Penetrant and dispersant for high temperatures. High HLB emulsifier. Low gel range.
TERGITOL™ TMN-100X (90%)	Excellent humectant, penetrant and dispersant. Good emulsifier agent.
TRITON™ HW-1000	Excellent emulsifier for waxes, paraffins and silicones.
TRITON™ X-15	Excellent oil soluble surfactant, emulsifier with low HLB.
TRITON™ X-35	Excellent oil soluble surfactant, emulsifier with low HLB.
TRITON™ X-45	Excellent oil soluble surfactant, emulsifier with low HLB.
TRITON™ X-100	Excellent humectant and emulsifier, compatible with a large variety of Als.
TRITON™ X-102	Excellent humectant and emulsifier, compatible with a large variety of Als.
TRITON™ X-114	Excellent humectant and emulsifier, compatible with a large variety of Als.
TRITON™ X-165 (70%)	Excellent stabilizer and dispersant for emulsions.
TRITON™ X-305 (70%)	Excellent emulsion stabilizer, offering stability for temperature cycles.
TRITON™ X-705 (70%)	Excellent emulsion stabilizers.
TRITON™ CG-50	Soluble in high alkaline solutions, low irritability, excellent humectant, high electrolyte stability. Ideal for formulations with glyphosate and/or nutrients.
TRITON™ CG-110	Soluble in high alkaline solutions, low irritability, excellent humectant, high electrolyte stability. Ideal for formulations with glyphosate and/or nutrients.
TRITON™ CG-425	Soluble in high alkaline solutions, low irritability, excellent humectant, high electrolyte stability. Ideal for formulations with glyphosate and/or nutrients.
TRITON™ CG-600	Soluble in high alkaline solutions, low irritability, excellent humectant, high electrolyte stability. Ideal for formulations with glyphosate and/or nutrients.
TRITON™ CG-650	Soluble in high alkaline solutions, low irritability, excellent humectant, high electrolyte stability. Ideal for formulations with glyphosate and/or nutrients.
TERGITOL™ XH	Steric stabilizer, increases stability and suspensibility. More polar characteristics when compared to TERGITOL™ XD.
TERGITOL™ XJ	Steric stabilizer, increases stability and suspensibility. Less polar characteristics when compared to TERGITOL™ XD.
TERGITOL™ XD	Excellent steric stabilizer and dispersant. Offers superior stability and suspensibility.
TERGITOL™ XDLW	Offers superior stability and suspensibility, with a humectant property. Handles better because it is a liquid.
TERGITOL™ L-61 (DOWFAX™ 63N10BRL)	Dispersant agent with efficient foam control.
TERGITOL™ L-62	Dispersant agent with efficient foam control.
TERGITOL™ L-64 (DOWFAX™ 63N40BRL)	Excellent steric stabilizer and dispersant. Offers superior stability and suspensibility.
DOWFAX™ 100N50	Excellent steric stabilizer and dispersant. Offers enhanced stability and suspensibility.
TERGITOL™ L-81	Dispersant agent with efficient foam control.
TERGITOL™ L-101	Dispersant agent with efficient foam control.

Nonionic Silicone Polyether Surfactants or “Superwetters”

Product	Molecule	Active (%)	Viscosity (cSt) ⁽¹⁾	HLB-EO ⁽²⁾	Surface Tension (dynes/cm)			Cloud Point ⁽³⁾	Flash Point (°C [°F]) ⁽⁴⁾	Properties
					0.100%	0.010%	0.001%			
XIAMETER™ OFX-5211 Superwetting Agent	Trisiloxane	100	41	11.5	21	23.4	36.5	< RT ⁽⁵⁾	101 (214)	Low molecular weight nonionic silicone polyether surfactant. Excellent surface tension reduction. Performance enhancer for agricultural chemicals, especially water-soluble broadleaf herbicides, insecticides, fungicides, and plant growth regulators. Rapid spreading and wetting for agricultural chemicals.
SYLGARD™ OFX-0309 Fluid	Trisiloxane	100	28	10.7	22	23.7	37.6	< RT ⁽⁵⁾	100 (212)	Organic Materials Review Institute (OMRI) Listed low molecular weight nonionic silicone polyether surfactant, developed to improve the wetting, spreading, and penetration of agricultural chemicals. Excellent surface tension reduction. Recommended to enhance performance of agricultural chemicals, especially water-soluble broadleaf herbicides and insecticides, fungicides, and plant growth regulators.

Contact your local Dow representative for sampling and regional availability.

⁽¹⁾Compared to other U.S. Environmental Protection Agency (EPA) approved antifoams.

Compound: Silicone fluids containing a suspension of finely powdered silica to enhance their defoaming efficiency. Primarily used in nonaqueous foaming systems.

Emulsion: Emulsified antifoam compound in water. Good option for controlling foam in aqueous applications.

Powder: Solid powdered compound antifoam. Can be added to dry products to prevent foaming when liquids are added.

- Enhanced performance
- Good performance
- Limited or no loss of performance
- Loss of performance
- Not evaluated

Product Stewardship

Dow has a fundamental concern for all who make, distribute, and use its products, and for the environment in which we live. This concern is the basis for our product stewardship philosophy by which we assess the safety, health, and environmental information on our products and then take appropriate steps to protect employee and public health and our environment. The success of our product stewardship program rests with each and every individual involved with Dow products – from the initial concept and research, to manufacture, use, sale, disposal, and recycle of each product.

Customer Notice

Dow strongly encourages its customers to review both their manufacturing processes and their applications of Dow products from the standpoint of human health and environmental quality to ensure that Dow products are not used in ways for which they are not intended or tested. Dow personnel are available to answer your questions and to provide reasonable technical support. Dow product literature, including safety data sheets, should be consulted prior to use of Dow products. Current safety data sheets are available from Dow.
